Environmental Policy

1. Objective and Scope

We, as Fiba Yenilenebilir Enerji Holding A.S., operate by adopting approaches devoted to the protection of natural resources and environment with the awareness of creating value for our stakeholders and the society in order to ensure sustainability of our success. It is our responsibility to preserve our existing resources and transfer them to future generations.

We aim at systematically defining the methods and principles related to identification of environmental aspects of the activities carried out by both Fiba Yenilenebilir Enerji Holding A.S. and all our affiliates, determination and control of the actual or potential material impacts of such activities on the environment within the framework of the life cycle, and assessing such life cycle.

2. Our Commitments as Fiba Yenilenebilir Enerji Holding A.S.:

We undertake towards

- Carrying out and constantly improving our wind and solar-based power generation activities in accordance with periodical revisions by applying our ISO 14001 Environmental Management System,
- Fulfilling our national and international legislative and compliance obligations regarding the environment,
- Accomplishing the goal of zero environmental accident jointly with all our employees, sub-employers, suppliers and customers,
- Carrying out activities that prevent environmental pollution, mitigate adverse environmental impacts, primarily prevent any and all such adverse impacts at source, and contribute to continuous improvement,
- Raising the awareness of our employees, sub-employers and suppliers in environmental issues, and ensuring continuity of such awareness,
- Recognizing our employees, sub-employers and suppliers, who contribute to the improvement of the applicability and sustainability of environmental standards,
- Using the energy and natural resources efficiently and protecting the environment,

- In line with the “Zero Waste” objective, primarily preventing the creation of waste, and secondarily, sorting the waste at source, mitigating and re-using it, and planning the disposal of wastes in compliance with the legislation,
- Sharing our environmental performance regularly and transparently with related parties on an annual basis within the scope of United Nations Global Compact, to which we are a signatory,
- Paying attention to environmental matters during decision-making processes of our new investments,
- Using our financial resources in the most efficient manner without compromising on environmental standards,
- Within the scope of protection of bio-diversity and ecosystems, taking actions for the preservation of the resources needed during our activities.

2.1. Our Activities for Combating the Climate Change

We, as Fiba Yenilenebilir Enerji Holding A.S., aim at actualizing our preparatory efforts and our commitment for the low-carbon economy, adapting our activities accordingly on the basis of the climate-related risks and opportunities, and informing the society and our shareholders about our efforts and the precautions we take.

- We contribute to the combat against the climate change. In this regard, we carry out activities to produce energy from renewable and clean sources and to lower our greenhouse gas emissions.
- We prioritize combating climate change and sustainability in all our activities.
- We make new investments in order to extend the use of renewable energy.

2.2. Our Water Management Activities

- We aim at using water, one of our major natural resources, efficiently, and carry out our activities accordingly.
- We determine the locations of our power plant sites in a safe distance to fresh water preservation areas, and preserve the bio-diversity in the fresh water sources situated in the vicinity of our sites.
- We ensure the continuity of the actions oriented at saving water and preservation of water resources during our activities.
